Executive Summary

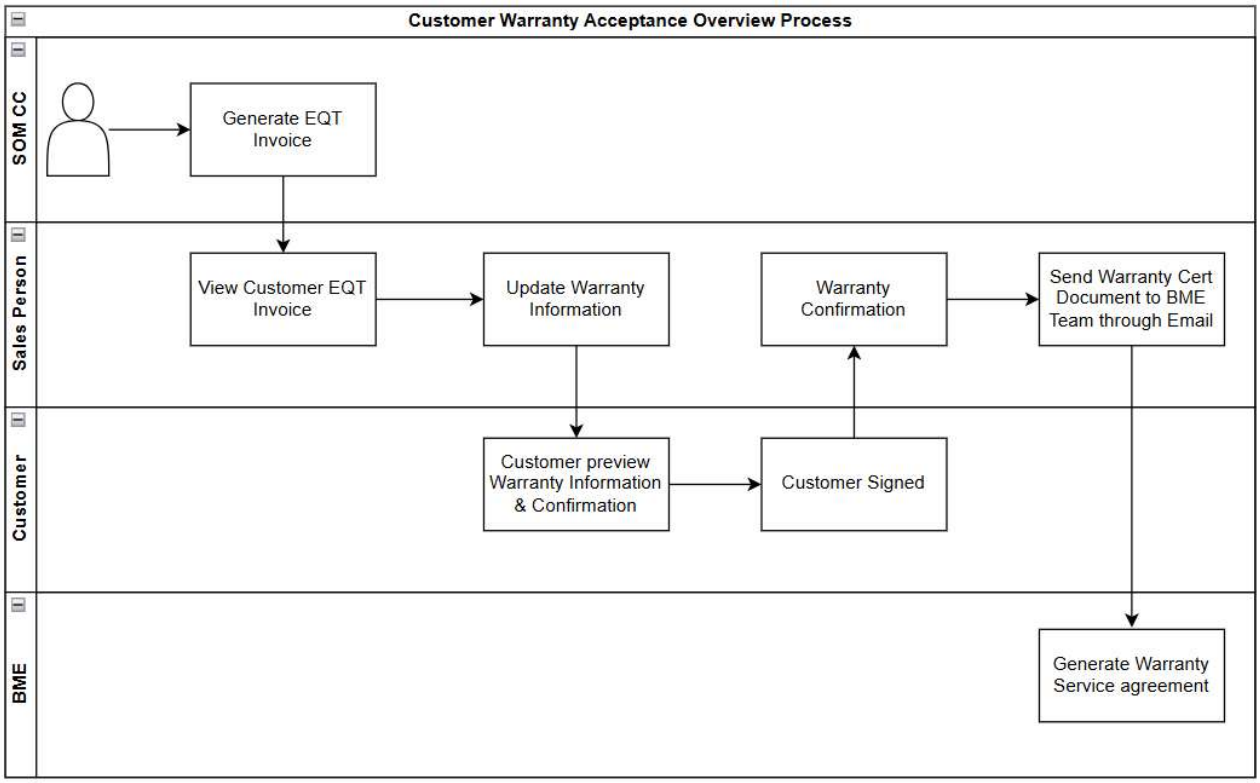
The objective of a functional design document (FDD) is to provide a clear, comprehensive, and actionable blueprint for how a system, product, or process will function from a user's perspective. It outlines the requirements, specifications, and plans for development, ensuring all stakeholders understand what the system should do and how it will operate.

It provides traceability of the functional specifications to the requirements approved by the stakeholders. This document includes the following: business use cases, system inputs and outputs, process flows, diagrams, and mockups.

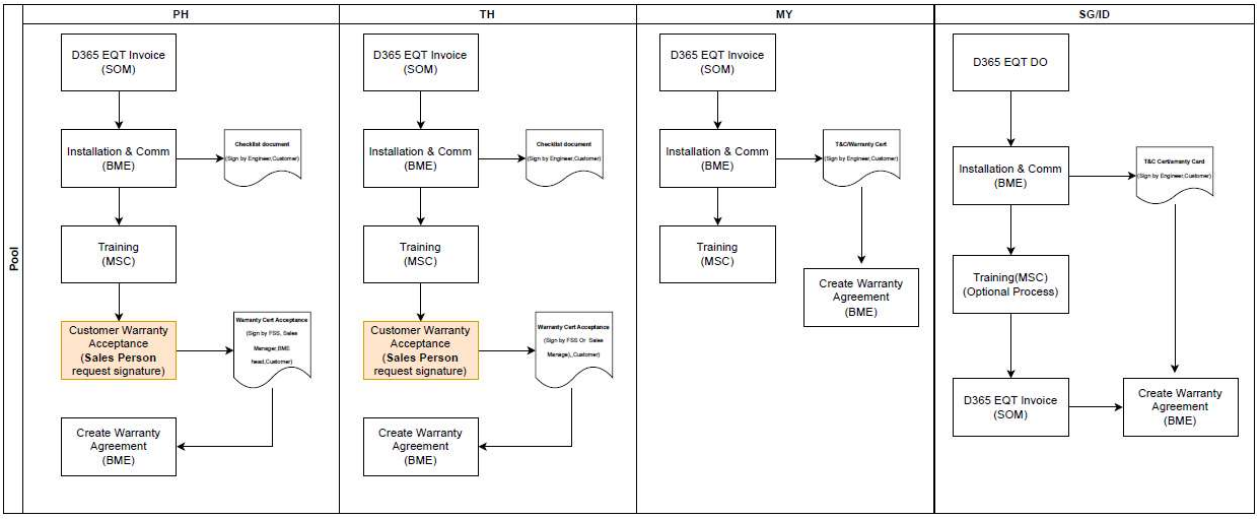
1.0 Introduction

- Customer Warranty Acceptance means capture and track customer's acknowledgement and they agreed to fulfil warranty term for EQT Invoice. The process is after a sales process.
- FSS is responsible to follow up and obtain the Warranty Acceptance with Customer.
- For As Is process, TH has implemented the acceptance process using Microsoft PowerApps since 2021
- However, TH has decided to terminate the license for Customer Warranty Acceptance as Microsoft has updated the licensing rules and cost has increased accordingly
- Overview of Process Flow

System Customer Warranty Acceptance



EQT Invoice Process flow by Country



2.0 Prototype Interface

5.0 EQT Invoice Data Synchronization

- EQT Invoice listing requires synchronization from D365 F&O.
- The following Data synchronization criteria:
  - Only need EQT with Serial Control Invoice. – "Open" Status. Require Warranty acceptance action.
  - Only Sales Invoice but Not required Service Invoice and Free Text Invoice.
  - Include Credit Note Sales Invoice – Auto change to "Completed" status. Use Prefix starting with "CN".
  - EQT Item Group Product Only.
  - Include Service Object Qualify = Yes.
  - Require at least 2 hours data synchronization sync from D365 F&O.
- For field mapping information, kindly refer to file path: Customer Warranty Acceptance Field Mapping.xlsx

© Copyright 2025 IDS Medical Systems.

6.0 EQT Invoice Listing Visibility & Processing Control

- To implement visibility view control.
- The objective
  - To control manage who can see what information, ensuring that sensitive or strategic data is only accessible to the right people.
  - Prevent information overload by showing only relevant data to each user.
  - By controlling visibility, you can track who is responsible for what, and ensure transparency.
- For FSS Role, The FSS person only can view own EQT Invoice. Not allow to view and execute EQT Invoice not belong to them. System will use “Owner” information to control the visibility.
- For Role like : FSS Leader/Manager/ Senior Manager/FSS Director allow to view only their subordinate EQT Invoice.
- For Role like RFM Manager, capable to view all EQT Invoices Listing in the country. Granted as super admin access right and have authority to perform update warranty information and follow up warranty acceptance sign off.
- One user may have multiple Business Units. Apply same visibility like Opportunity concept which developed in the SPARKS Sales.

7.0 Main Menu & Profile

7.1 Main Menu

No	Label	Explanation
1.	Dashboard	[Phase 2]
2.	Notification	[Phase 2]
3.	EQT Invoice	[Phase 1] - To view EQT Invoice Listing and perform warranty acceptance process. - Under EQT Invoice menu, sub menu as follow (i) All Listing (ii) Open Listing (iii) Completed Listing (iv) Cancelled Listing
4.	Setting	This is setup for country parameter.
5.	Sign Out	Sign Out to end the session.

© Copyright 2025 IDS Medical Systems.

		- FSS & FSS manager granted access to trigger Cancel Invoice request. 
(ii) Product Information & Warranty – Refer to the Product Information & Warranty section.
(iii) Attachment – [Phase 2 Implementation]
(iv) History Log – [Phase 2 Implementation]

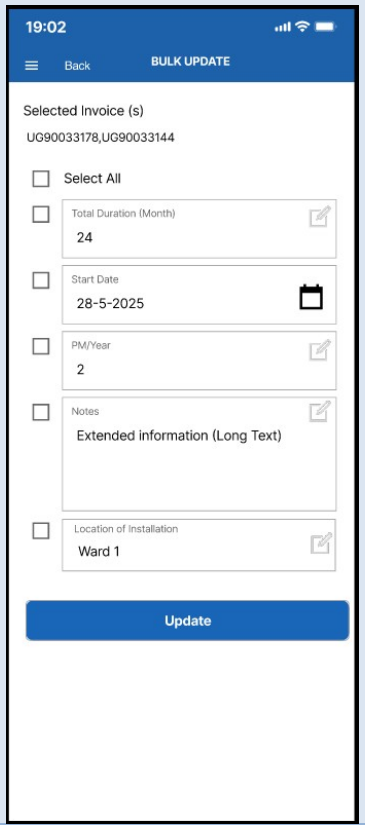
9.3 Product Information & Warranty & Signature

No	Functionality	Explanation
1.	Bulk Warranty Update	- Allow to perform single or multiple invoice to trigger bulk warranty information update. - Once checked box with ticked, system will copy the information to the selected Product Serial. - Example, if user enter the text box and Checkbox not check. System will skill update the particular information. - The following information allow for bulk update action

Label	Login & Explanation
Total Duration (Month)	- This is input in Month Unit. - Integer format - System will validate when input incorrect format. - Example : 24 unit indicate 2 years.
Start Date	- Choose calendar picker and select the date. - Date format : DD-MM-YYYY - Once start date is entered, system will auto calculate End date. - **End Date formula** : Start Date + Today Duration(Month) – 1 day.
PM/Year	- This is integer value. - To capture preventive maintenance per year.

© Copyright 2025 IDS Medical Systems.

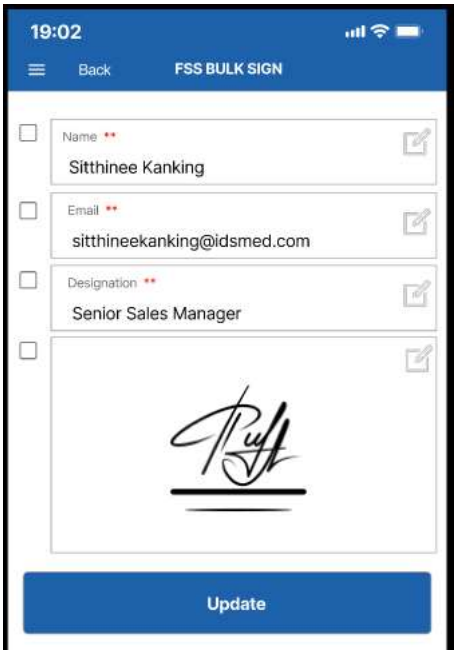
		- Once entered PM/Year field, system will auto calculate Total PPM. - **Total PPM formula** : ((Total Duration(Month) * PM/Year) /12)
		Notes - Free text input.
		Location of Installation - Free text input to insert location of machine installation.
		Update function - System perform validation check. - Update to system successfully when validated ok. - Prompt message when validated is fail.



2.	Bulk FSS Sign	- This function to help perform bulk FSS signature based on selected Product serial level. It's allow single or multiple update. - Allow to bulk update multiple information at once. **Label** **Login & Explanation**

Name	- Free text Format - System default populate from User Profile.
Email	- Free text Format. - System default populate from User Profile.
Position	- Free Text format.
Signature	- Click edit icon to display update signature screen.
Update function	- System perform validation check. - Update to system successfully when validated ok. - Prompt message when validated is fail.

-



3.	Bulk Cust Sign	- This function to help perform bulk Customer signature based on selected Product serial level. It's allow single or multiple update. - Allow to bulk update multiple information at once.

© Copyright 2025 IDS Medical Systems.

Label	Login & Explanation
Customer Contact Name	- Free Text manually Input the Customer Contact Name
Customer Email	- Free Text manually Input the Customer Contact Email address. - System to validate a valid email format.
Customer Department/Ward	- Free Text manually Input the Customer Department/Ward
Customer Contact No	- Free Text manually Input the Customer Contact No.
Customer Position	- Free Text manually Input the Customer Position.
Signature	- Click edit icon to display update signature screen. -

		4.	FSS MRG Bulk Sign	[Phase 2 Implementation]
5.	BME Email to sign	[Phase 2 Implementation]
6.	Product Serial Filter	- Click the filter icon and allow to perform filter columns. Then Product serial listing will reflect based on filtered criteria. - Allow apply multiple filter.  **Field** / **Filter Criteria** Product Name: This is contain Criteria. Allow to search “keyword”. User manually input the keyword and apply the filter.

Product Code	This is contain Criteria. Allow to search “keyword”. User manually input the keyword and apply the filter.
Customer Signature Status	Selection Value - Pending - Signed
FSS Signature Status	Selection Value - Pending - Signed
Start Date	Start Date. Manual click the Calendar picker Input single date. E.g DD-MM-YYYY
End Date	End Date. Manual click the Calendar picker Input single date. E.g DD-MM-YYYY
End Customer Name	This is contain Criteria. Allow to search “keyword”. User manually input the keyword and apply the filter.
FSS Name	This is contain Criteria. Allow to search “keyword”. User manually input the keyword and apply the filter.
Serial Number	This is contain Criteria. Allow to search “keyword”. User manually input the keyword and apply the filter.
